-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 September 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II, claims 21-29, 74, and 75 in the reply filed on September 2, 2004 is acknowledged.

Priority

2. Receipt is acknowledged of papers filed under 35 U.S.C. 119 (a)-(d) based on an application filed in Germany on May 11, 1999. Applicant has not complied with the requirements of 37 CFR 1.63(c), since the oath, declaration or application data sheet does not acknowledge the filing of any foreign application. A new oath, declaration or application data sheet is required in the body of which the present application should be identified by application number and filing date.

Specification

3. The abstract of the disclosure is objected to because it is longer than 150 words. The abstract currently on file contains 24 lines, whereas it should only contain about 15. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 21-23, 25-29, and 75 are rejected under 35 U.S.C. 102(e) as being anticipated by Lin et al (U.S. Patent 5,932,365). The reference is directed to a hydrogen canister fuel cell battery. The fuel cell is insertable into a consumer device such as a notebook computer (see col. 5, line 50). The hydrogen canister is removable when the hydrogen supply is depleted (see col. 5, line 31). Atmospheric air is supplied to the fuel cell cathode by a ventilator device (fan 51) (see Fig. 2A). Regarding claim 28, the fan is adjustable. Regarding claims 22 and 23, the hydrogen canister is pressurized and thus functions in conjunction with connecting passageways as a “pump device” to supply hydrogen to the fuel cell.

Thus, the instant claims are anticipated.

6. Claims 21-27, 29, and 74 are rejected under 35 U.S.C. 102(e) as being anticipated by Kelley et al (U.S. Patent 6,268,077). The reference is directed to a portable fuel cell power

Art Unit: 1746

supply. The fuel cell is insertable into a consumer device such as a radio (see col. 2, line 40). Hydrogen is supplied from a storage tank (110) via a pump device (regulator 120) (see Fig. 1). The tank is removable when the hydrogen supply is depleted (see col. 3, line 42). Atmospheric air is supplied to the fuel cell cathode by a ventilator device (vent 357) (see Fig. 3). Regarding claim 24, the hydrogen regulator is adjustable.

Thus, the instant claims are anticipated.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan Crepeau whose telephone number is (571) 272-1299. The examiner can normally be reached Monday-Friday from 9:30 AM - 6:00 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr, can be reached at (571) 272-1414. The phone number for the organization where this application or proceeding is assigned is (571) 272-1700. Documents may be faxed to the central fax server at (703) 872-9306.
